

**Debating Ethical Scenarios**

**Scenario:** A company decides to replace human workers with AI to increase efficiency. Debate the ethical implications of this decision.

**Scenario:** Governments should have the right to access personal data to prevent terrorism. Is this ethical?

**Scenario:** Is it ethical for companies to use animal testing for product safety?

**Scenario:** Should wealthy nations be obligated to help poorer countries deal with climate change?

**Scenario:** Is it ethical for parents to monitor their children's online activities without their consent?
